

Assembly Instructions

1. Print Template at 100% scale on heavy, cardstock paper.
2. Use an X-acto knife to cut out all the black rectangles.
3. Use an X-acto knife to cut on the dotted black lines.
4. Fold funnel tabs towards each other along the pink lines.
5. Pin template to your ironing board.

Use Instructions

1. Cut fabric into 1.5" strips.
2. With the wrong side facing up, feed the beginning of the strip under Tab 1 and Tab 2.
3. Finger-press the first inch of so of the strip into bias tape by folding both the top and bottom edges towards the center. Fold about 0.25" in, which will leave a small space between the two edges.
4. Continue to feed the strip under Tab 3, Tab 4, and finally Tab 5.
5. Be sure that the fabric is tucked evenly into the two sides of the funnel.
6. Pull the fabric out about 6" past the end of the template and press.
7. Finally, place your iron at the end of the template and pull the strip through the template and under the iron to make your single-fold bias tape.

*For double folded bias tape, fold the single-fold bias tape in half lengthwise and press.

Pro Tips

1. Place a piece of scrap fabric under your iron to prevent burning your ironing board.
2. If the folds aren't holding, try pulling the strip through at a slower pace.
3. Use one hand to pull the strip through and the other to make sure the fabric is going through the tunnel correctly.
4. Sew all your strips together end-to-end so that you don't have to keep "threading" the template.
